MACHINE CONTROL PRODUCTS

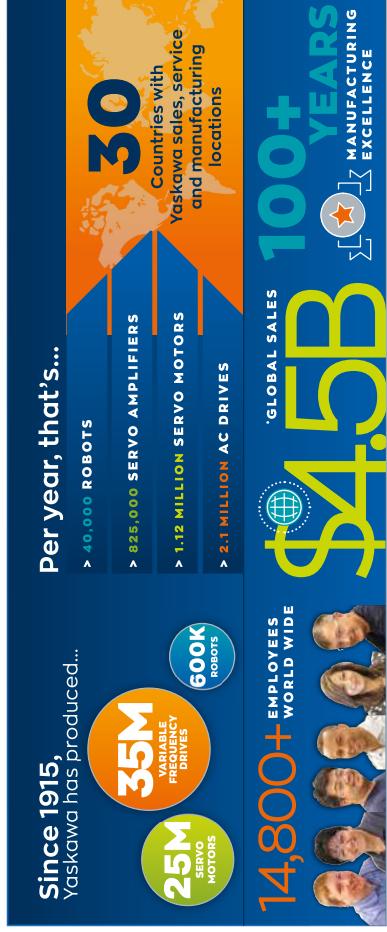

RETHINK WHAT'S POSSIBLE

RETHINK WHAT'S POSSIBLE

YASKAWA EXPERIENCE: BY THE NUMBERS

Based on 2023 reported sales. For reference only.

Today's machine builders and equipment users face unique challenges, with limited resources and tight deadlines. Your success depends on suppliers with the right products, the expertise in applying them and a commitment to supporting them in the field.

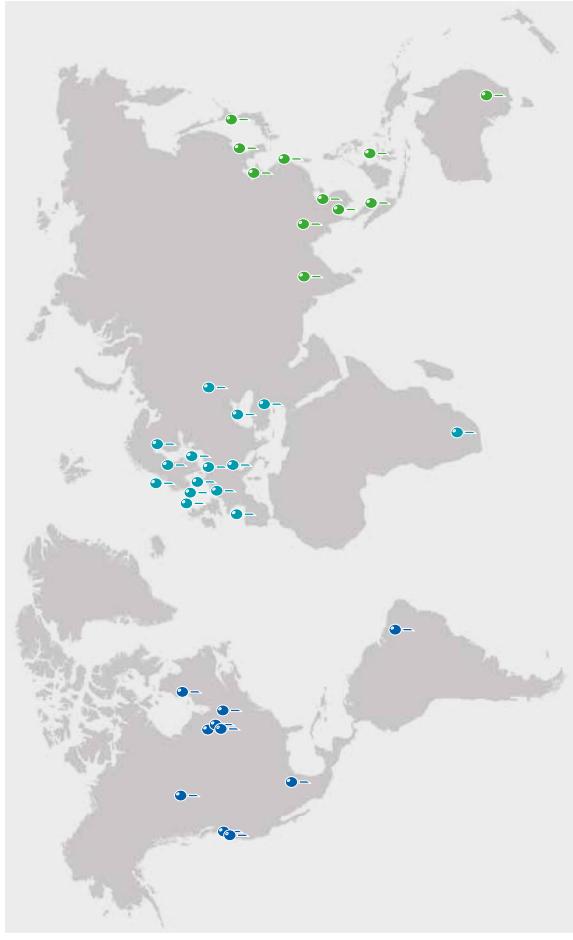

SOLVING PROBLEMS IS IN OUR DNA

We embrace the toughest challenges to solve the biggest problems. Dedication to engineering and innovation is what makes us different.

GLOBAL OVERVIEW

World leader in automation, drive technology and robotics

YASKAWA GLOBAL LOCATIONS

PRODUCTS THAT PERFORM

You no longer need to settle for “good enough”.

iCUBE ENGINEER

A single software development environment for motion, logic, and safety, iCube Engineer gives developers the freedom to program in IEC61131-3 or other high-level languages.

HMI DESIGNER

HMI development environment that allows projects to run on smartPanel, PanelPC, PC, iC9200, and HTML5 web panel.

SIGMA SERIES SERVO SYSTEMS

A single EtherCAT-based machine controller for motion, logic, kinematics, safety, security, and more, the iC9200 is designed by Yaskawa specifically for demanding machine control applications.

VARIABLE FREQUENCY DRIVES

Yaskawa drives offer simple motor setup with highly flexible network communications, embedded functional safety, no-power programming and mobile device connectivity with our DriveWizard mobile app

YASKAWA SLIO

The most effective, modern decentralized I/O systems available, providing exceptional usability in an extremely compact and functional design.

HMI

Yaskawa smartPanel and Panel PC solutions monitor and interact with your machine easily and reliably.

ROBOTICS

Yaskawa offers articulated, delta, SCARA and collaborative packaging robot models compatible with simple-to-integrate robot controllers, as well as our MotionWorks IEC programming environment.

ROBOTICS

CONTROLLER HARDWARE/SOFTWARE

ic9200 / iCUBE ENGINEER

iCube Control: A Total System for Total Control

iCube Control is the open automation machine control technology solution that gives engineers, application developers, machine builders, and designers, total control over their systems. The ic9200 machine controller and iCube Engineer programming software form the foundation for iCube Control.

ic9200 MACHINE CONTROLLER

THE MACHINE CONTROLLER FOR ALL

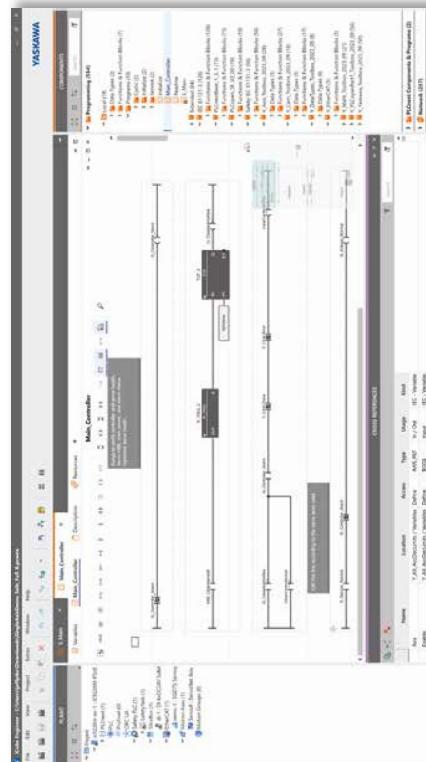

A single machine controller for motion, logic, kinematics, safety, security and more. The ic9200 is ready for any challenge you face today and that you will face tomorrow.

iCUBE ENGINEER

ENGINEERED FOR YOUR OPPORTUNITIES

Open up your possibilities and develop more efficient solutions. Designed for collaborative working, iCube Engineer gives developers the freedom to program motion, logic, and safety in IEC61131-3 or other high-level languages.

NETWORK COMMUNICATIONS

OPC UA, EtherNet/IP, Modbus TCP, Profinet, I/O Link

FLEXIBLE I/O

Expandable local I/O using standard SLIO Slice I/O

YASKAWA TRITON PROCESSOR

- 3 core ARM Cortex-A17 1.2GHz processor for fast processing of synchronous motion tasks

SAFETY OVER ETHERCAT

- Integrated EtherCAT machine controller and EtherCAT safety master
- High-speed DDR4 memory and eMMC flash
- Integrated real-time Ethernet network support

CONTROL SYSTEM SECURITY

- Secure web-based management with multi-level password protection
- Secure OPC UA communications
- Designed for network security certification per ISA/IEC 62443

INTEGRATED ENVIRONMENT

Motion, Robot, Logic, and VFD

Fully integrated SIL 3 safety programming

Network configuration, diagnostics and security

OPEN PROGRAMMING

- IEC61131-3 graphical, structured text or SFC programming
- Create libraries with C#, C++ and other high-level languages

CONTROL SYSTEM SECURITY

Device certificates and multi-user password protection

COLLABORATIVE

- Managed program access for multiple developers
- Online editing and version detection

HMI DESIGNER

Integrated HMI Development Environment

FEATURES

- 200+ drivers (HMI can act as a protocol converter)
- Recipe Manager
- Alarm Handling
- JavaScript
- Trending
- Datalogging
- Project simulation
- OPC UA online browsing
- OPC UA tags synchronize with iCube Engineer projects
- Projects on Yaskawa panels
- Projects on PCs
- Project on iC9200
- Modbus/TCP tag import from Motionworks IEC project

HMI Designer

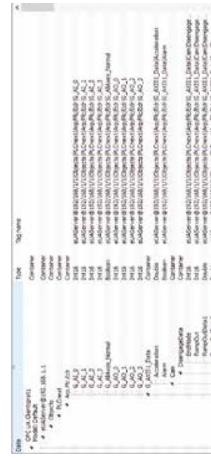

HMI Designer is an HMI development environment that is included with iCube Engineer at no additional cost.

It is available as a stand-alone version also for use with MPiec products using the Modbus/TCP driver.

Projects can run on smartPanels, PanelPCs, PCs, iC9200, or HTML5 web panels and iCube Engineer OPC UA tags will synchronize with the HMI project.

HMI DESIGNER COMMUNICATION

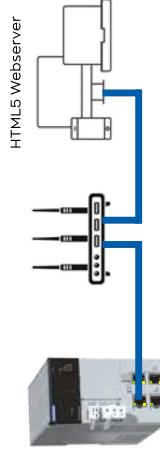

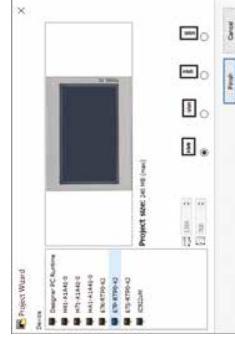

- OPC UA is the preferred communications protocol
- HMI is the Client
- Controller is the Server
- Security settings are available
- User data types are transferred to the HMI project
- Structures, arrays, etc., don't need to be broken down by the user

User Widget Gallery

Snap to Grid Alignment Tool

Cross Reference

HMI PROJECT ON iC9200

- iC9200 hosts the HMI project (WebVisu)
- Uses iCube resources 3rd core processor, memory
- Generic HTML5 device used for viewing
- iC9200 is selected as the target
- If "unified" project is selected (default), same project can be sent to controller or HMI panel

HMI PRODUCTS

SMARTPANEL

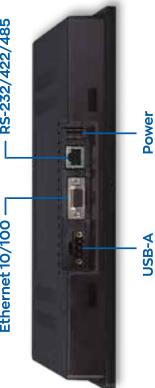

The smartest choice for usability, performance and connectivity to iC9200 and MPiec controllers

The slim design and rugged resistive touch screen of the smartPanel is perfect for the everyday industrial applications.

FEATURES

- ARM Cortex Processor
- Robust and durable- IP66 protection rating (front)
- Rugged resistive touchscreen
- Familiar Windows system environment
- Slim space saving profile
- OPC UA with iC9200 and PLCI communication with MP3300iec, MP2600iec, and Sigma-7siec using native data types

Operating System				Linux		
Runtime				HMIDesigner		

The latest performance features and a precise, responsive capacitive touchscreen combine in Panel PC to deliver outstanding usability in a small space.

FEATURES

- Intel Celeron Processor
- Large integrated work memory
- High resolution responsive capacitive touchscreen
- Familiar Windows system environment
- Numerous interfaces for every application need
- Fanless construction
- High-quality metal housing
- OPC UA with iC9200 and PLCI communication with MP3300iec, MP2600iec, and Sigma-7siec using native data types

INPUT/OUTPUT PRODUCTS

YASKAWA SLIO

Compact. Intelligent. Flexible.

The most effective decentralized I/O system available, SLIO is designed to help you modernize and standardize while retaining a sense of flexibility. SLIO can help reduce setup time and minimize user errors.

HIGH SPEED BACKPLANE BUS

Achieve reaction times as fast as 20 microseconds with SLIO's high speed backplane bus. Connect as many as 64 modules at a time, while maintaining speeds up to 48 Mbit/s.

EASY WEB INTERFACE

SLIO diagnostic and status information is accessible through a web interface, linking a standard browser to any fieldbus module.

INSTALLER-FRIENDLY DESIGN

Engineered for error-free installation, SLIO can be installed by an average technician without consulting a machine designer or installation engineer.

RECONFIGURE WITHOUT WIRING

Updating or amending a SLIO system is as easy as removing an existing module and snapping in a new one. System functions can be changed without removing the wiring from the contact block.

SIDE MOUNTING

Mount SLIO I/O directly to an iC91200 series controller using the controller's integrated Slice Bus.

SERVOPACKS

SIGMA SERIES SERVOPACKS

A smarter SERVOPACK to enhance productivity

The Yaskawa Servo Tuning Suite

We've packed 25 years of innovation and five generations of servo expertise into our Sigma Series tuning features.

Yaskawa equips each SERVOPACK with a suite of software commissioning and tuning tools, designed to achieve full functioning right out of the box. This superior performance continues in spite of the vibration, resonance, friction and noise that a modern automated machine can dish out.

Eliminate effects that steal away performance

Unwanted mechanical effects rob a servo system of the quick, smooth and precise movement you need. Yaskawa SERVOPACKS are equipped with suppression features that automatically eliminate harmful artifacts.

VIBRATION

Machine vibrations are eliminated by Yaskawa Vibration Suppression, which samples your equipment's natural oscillations and uses compensating frequencies to cancel them out.

RESONANCE

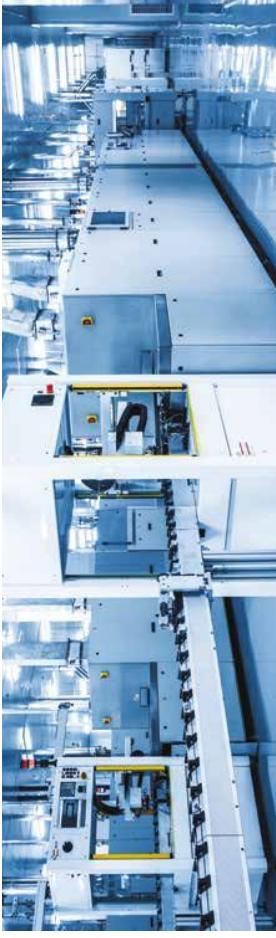

Sigma-7 SERVOPACKS have twice as many anti-resonance filters to more effectively repress a servo system's natural medium-frequency resonances.

COGGING

Motor cogging effects are removed by Ripple Compensation, an especially important effect for systems that require minimum settling time and exceptionally precise positioning.

ELECTROMAGNETIC INTERFERENCE

The number of interference filters has been increased by 225% to counteract losses caused by data dropouts, EMI interference and artifacts from long cable runs.

ONE PARAMETER TUNING

Precise User-Driven Adjustment

ADVANCED AUTOTUNING

Improve your machine's performance even further with easy fine tuning adjustments that won't throw off your existing operating parameters.

TUNING-LESS FUNCTION

Minimize Settling Time. Maximize Smooth Motion Advanced auto tuning automatically adjusts nearly 20 gain and filter parameters to cancel vibration, rippling, friction and resonance.

SETTLING TIME

0-4 ms RANGE

SETTLING TIME

4 ms RANGE

SETTLING TIME

40 ms RANGE

SETTLING TIME

SERVOPACKS

SIGMA SERIES SERVOPACKS

Feature-packed for your machine

Sigma-X SERVOPACKS

With real-time data collection, speeds up to 7000 RPM, frequency response of 3.5 kHz, and multi-axis amplifiers with expanded functions to improve precision, Sigma-X takes servo response to a higher level to maximize your machine performance.

Sigma-X SERVOPACKS are EtherCAT-compatible to communicate seamlessly with our iCube Control platform.

Available 200 V models range from 50 wW up to 15 kW.

INTEGRATED DATA COLLECTION AND VISUALIZATION

- Servo motor acts as a sensor to collect data to be used for preventive maintenance
- Operation optimization monitor ensures efficient equipment operation
- Detects equipment errors by comparing data stored in servo amplifier with operational data

EXPANDED FUNCTIONS TO IMPROVE PRECISION & QUALITY

- Speed ripple compensation
- Output torque compensation
- High resolution 26-bit absolute encoder feedback

MULTI-AXIS SERVO AMPLIFIERS

- Reduces control panel size
- Reduces wiring time
- Two- and three-axis servo amplifiers available

***ΣX*: Bring iCube Control to Life!**

Variety of Sigma-7 SERVOPACK products to fit your application

SGD7S

Single-Axis SERVOPACK

- 100 V, 200 V and 400 V operation
- 50 W - 15 kW operating range
- Control interface options:
 - EtherCAT
 - MECHATROLINK
 - Analog

SGD7W

Dual-Axis SERVOPACK

- Control two servo axes with one SERVOPACK
- Lower cost, component count, less cabinet space
- 200 V or 400 V operation
- Regenerative power feature conserves energy

MP2600IEC

SIGMA-7 IEC

Single-Axis Controller

- Controller and SERVOPACK in one device
- IEC 61131-3 compatibility for predictable behavior
- Scalability between single and multi-axis control
- EtherNet/IP, Modbus TCP/IP and OPC-server connectivity
- Built-in web server

SIGMALOGIC7

PLC-Ready SERVOPACK

- Add On Instructions (AOIs) for use with Rockwell PLCs
- Dual EtherNet/IP ports onboard
- Perform functions without learning new software
- Basic point to point moves, blended speed moves, homing, jogging, electronic gearing

ADVANCED NETWORK SAFETY

FSoE SERVOPACK

- Functional Safety over Ether-CAT (FSoE)
- System certification to Safety Integrity Level 3 (PLe)
- Lower cost, component count, less cabinet space
- 16 supported safety functions

SERVOPACKS

SIGMALOGIC7

Improve machine performance for PLC-based control

SigmaLogic7 SERVOPACKS add the superior performance and reliability of a Yaskawa servo system to your PLC-based machine without leaving the familiar programming environment of your existing PLC.

Utilize Yaskawa-written, Yaskawa-tested add-on instructions (AOIs) in RSLogix5000 software, with a ControlLogix or CompactLogix PLC.

MOTION SEQUENCING WITH AOIS

- Perform functions including point-to-point and blended moves, jogging and homing
- Use direct commands or 200-point configurable sequence table
- Utilize extra 7 inputs and 3 outputs on SigmaLogic7 SERVOPACK
- Use LogicWorks software to download sequence and configuration data

YASKAWA AOIS

- Created for full compatibility with all CompactLogix and ControlLogix PLCs using RSLogix5000 software v17 and above
- Named to be familiar to Rockwell users
- Right-click instruction help available for all instructions in the PLC programming environment
- Sample program available in RSLogix5000

We've done the heavy lifting to make Integration of Yaskawa servo, robotic and variable frequency drive components simple and effortless for your PLC programming environment.

SIGMALOGIC7 SYSTEM DIAGRAM

Extend system performance and reliability with additional Yaskawa PLC tools

ROBOTICS

Yaskawa's MLX Unified Controls™ software option:

- Tag Generator: Easily create a tag file that can be imported into Logix Designer/RSLogix 5000
- Faceplates: Import faceplates to access commonly used parameters and monitors
- AOIs: Import our library of AOI using Yaskawa EtherNet/IP option

VARIABLE FREQUENCY DRIVES

- Software utility to create individual move profiles and sequencing for the application
- Upload/download sequence table and configuration data to/from LogicWorks™
- Embedded monitoring and test functions

SERVOPACKS

BUILT-IN SINGLE AXIS CONTROL

Single and 1.5 axis controller options

SIGMA-7 IEC SINGLE-AXIS CONTROL OPTION

I/O FEATURES

- 7 digital inputs
- 4 digital outputs

You wouldn't guess from their trim size that Yaskawa has packed a single-axis motion controller and a world class SERVOPACK into a space slimmer than most normal servo amps occupy.

That means less crowding in control cabinets, plus the easy familiarity of IEC 61131-3 programming.

MP2600 IEC 1.5-AXIS CONTROL OPTION

I/O FEATURES

- 15 digital inputs
 - 11 digital outputs
 - 1 analog input
 - 1 analog output
 - 1 external encoder input
 - 1 external encoder latch
- Both of these SERVOPACKs provide a compact, all-in-one servo/controller package with the following features:
- IEC 61131-3 standard programming environment with PLCopen function blocks for motion control
 - Self-tuning, anti-vibration and other high performance, easy-to-implement servo control features
 - Ethernet/IP, Modbus TCP/IP and OPC server provide connectivity to PLCs, HMI's, SCADA, MES and ERP
 - Scalability with the multi-axis MP3500 IEC controller via common MotionWorks IEC programming environment
 - Web server that allows for maintenance diagnostics and troubleshooting

INTEGRATED NETWORK SAFETY

Failsafe over EtherCAT (FSoE)

iCube Control combines automation technology with the certainty of machine safety you need to operate successfully, all in one fully integrated platform.

SAFETY SIMPLIFIED

iC9200 machine controllers are available with an integrated EtherCAT (FSoE) safety master, eliminating the need for an external safety PLC and allowing all safety and non-safety EtherCAT devices to be integrated onto a single network.

Safety applications are programmed using certified safety function blocks in iCube Engineer, allowing you to use a single software engineering tool for programming safety and non-safety logic and motion.

BENEFITS

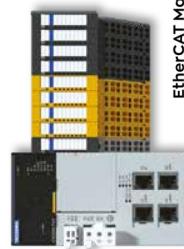

- Cut down your engineering hours with simplified electrical designs
- Slash your commissioning time with fewer cables to wire and test during your assembly process
- Shorten your BOM and reduce machine cost by eliminating safety relays and using fewer cables
- Condense your electrical cabinet footprint with fewer components to install
- Simplify your safety logic with user-friendly software
- System certification to SIL 3, PL e

SAFETY FUNCTIONS SUPPORTED

- Safe Torque Off (STO)
- Safe Stop 1-t (SS1-t)
- Safe Stop 2-t (SS2-t)
- Safely Limited Speed (SLS)
- Safe Speed Range (SLR)
- Safely Limited Position (SLP)
- Safely Limited Torque (SLT)
- Safe CAM (SCA)
- Safe Operating Stop (SOS)
- Safe Stop 1-r (SS1-r)
- Safe Stop 2-r (SS2-r)
- Safe Direction (SDA)
- Safely Limited Acceleration (SLA)
- Safe Motor Temperature (SMT)
- Safe Speed Monitor (SSM)

Up to 10 Safety Functions per SERVOPACK can be configured simultaneously

THE NEW SOLUTION: NETWORKED SAFETY

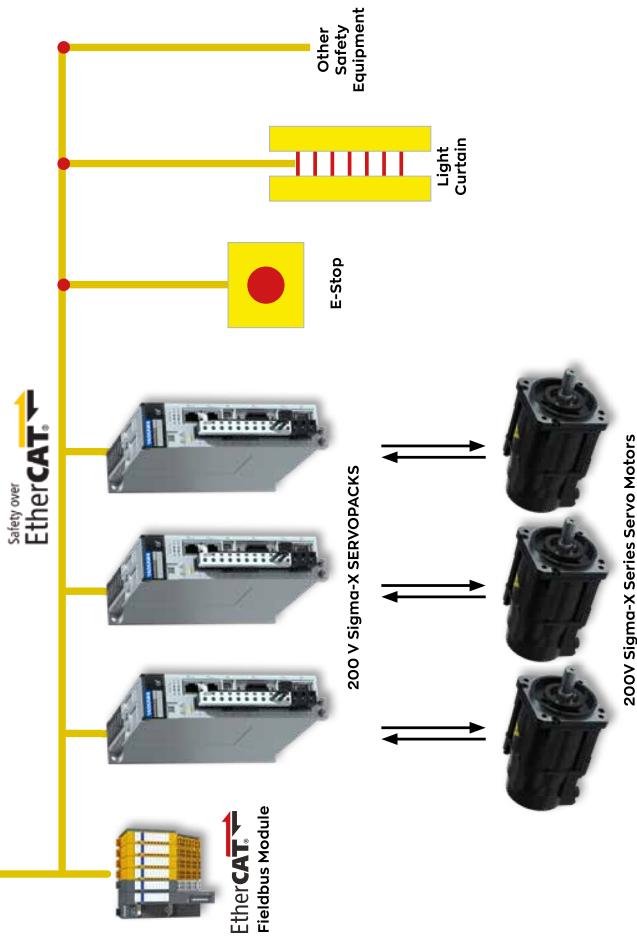

SIL 3, PL e

Yaskawa Servopacks featuring the Advanced Safety Module provide safe motion, meeting SIL 3, PL e requirements, which is suited for:

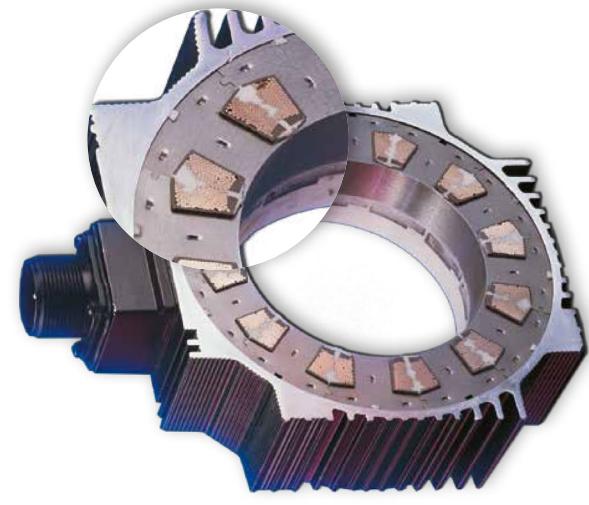

- Machines where serious injuries are possible,
- Frequency of exposure is long and/or frequent
- Possibility of avoiding injury is scarcely possible

SLIO safety input and output modules can be mounted directly to the iC9200 controller or remotely on an EtherCAT fieldbus module.

SIGMA SERIES SERVO MOTORS

Packed with performance

MORE TORQUE IN LESS SPACE

- Yaskawa's segmented stator core design and automated winding techniques pack nearly twice the copper into the stator gap, for much more torque output from every square millimeter of space.
- Encapsulated windings prevent shorts between windings, improving heat dissipation.
- Precise machining is used to minimize the air gap between rotor magnets and stator windings, for higher running torque and reduced cogging torque.
- By reducing the space taken up by the end turns of the winding, overall motor length is significantly reduced.
- Neodymium-Iron-Boron rotor magnets optimize flux density in the motor.

BATTERYLESS ABSOLUTE ENCODER

- Simplifies wiring in control panels.
- No concerns about losing rotational data if battery runs out.
- No need to stock batteries.

HIGH RESOLUTION 26-BIT ENCODER

- The resolution of the encoder has been increased to 26 bits, four times that of Sigma-7.

Encoder resolution 26 bits \approx 67 million pulses/rev

SGMXG SGMXA SGMXP SGMXJ

INCREASED SPEEDS

The maximum rotation speed of the motor has increased from the earlier value of 6,000 RPM to 7,000 RPM.

Applicable models: All SGKX-, SGKA-, and SGXP models. SGXG models increased to 4000 RPM

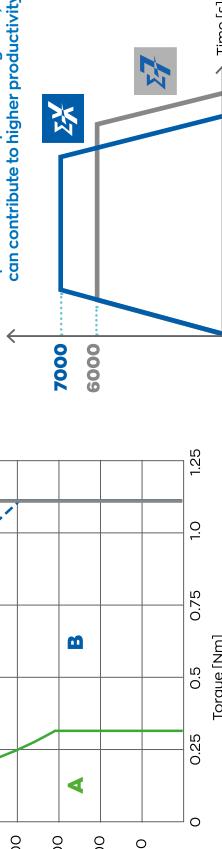

ΣX 6000 RPM

Positioning time

Speed (RPM)

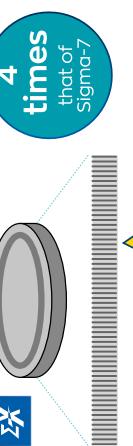

Improving maximum servo motor rotation speed can reduce positioning time, which can contribute to higher productivity.

Time [s]

Encoder resolution 26 bits \approx 67 million pulses/rev

4 times that of Sigma-7

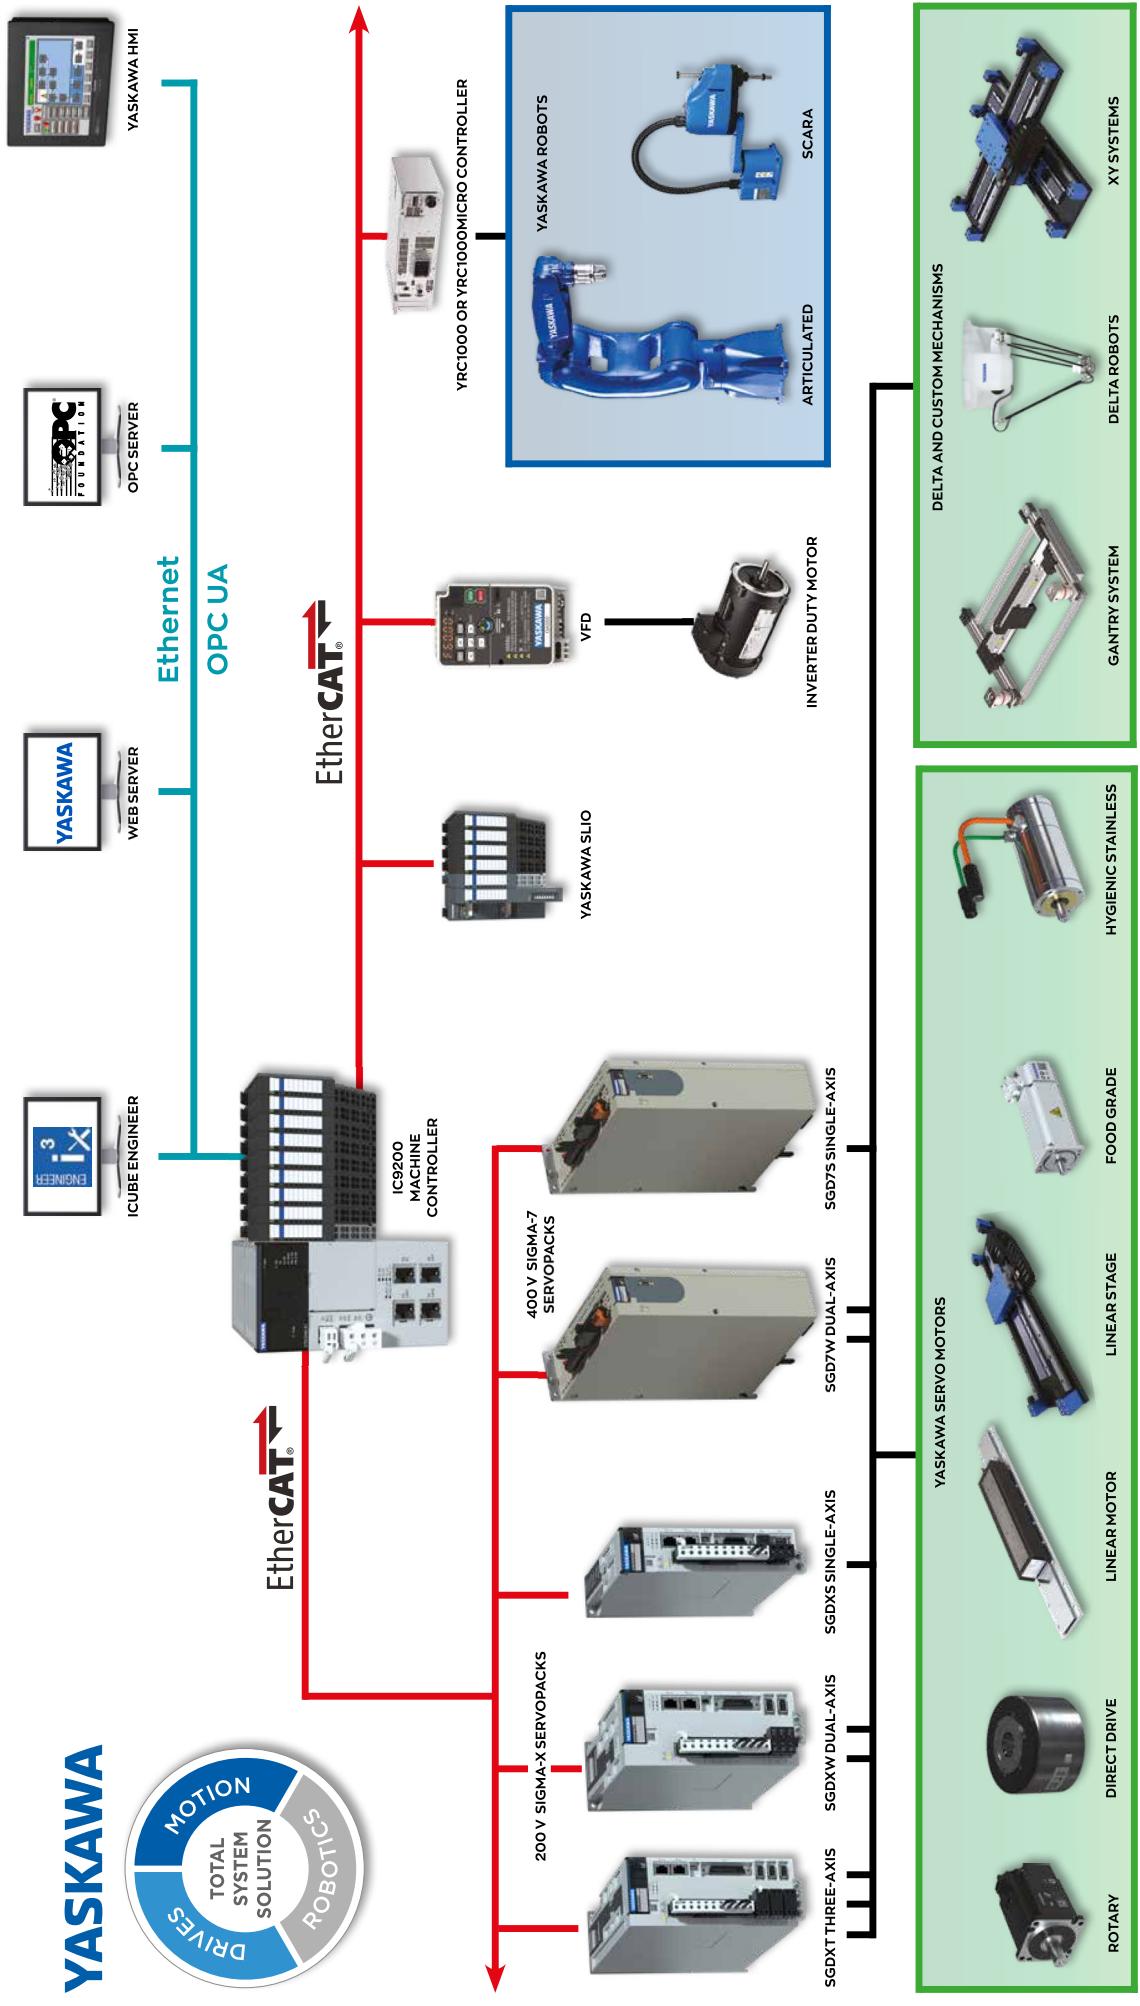

Increased positioning resolution/stop precision ----> Precise stops

Decrease in speed ripples ----> Smooth movement and improved machining precision

ΣX ENHANCEMENTS

For improved equipment performance

SYSTEM CONFIGURATION

SERVO MOTORS

DIRECT DRIVE MOTORS

Boost the quality of your design

Direct drive motor technology provides a host of improvements in the quality of a machine's design.

- Less audible noise
- Reduced maintenance of mechanical transmissions
- Overall efficiency and performance increased, leading to lower long-term cost

SGM7E
(Coreless, Inner Rotor)

Ideal for smooth movement without speed fluctuations.

- Built-in 24-bit encoder
- Low cogging with a coreless system provides smooth operation free from speed variations.
- Low inertia / low heat generation
- Ideal for applications that require downsizing and shorter cycle time.
- Built-in 24-, 22- & 20-bit encoder
- Compact design with small rotor diameter
- High-speed, high frequency positioning
- High rigidity

SGM7D
(With Core, Outer Rotor)

Ideal for high torque, high precision and high rigidity.

- Built-in 24-bit encoder
- High allowable load moment of inertia ratio for large loads
- Large center aperture provides more space for wiring
- Zero cogging reduces force ripple
- Standard and high force magnetic ways
- 40 to 3000 N of peak force
- 5 m/s peak speed
- 200 V or 400 V windings
- 135 to 7560 N of peak force
- 5 m/s peak speed
- Very little cogging

SGLG
(Coreless)

Smooth linear motion with an ironless design that eliminates motor cogging.

- 200 V windings
- 40 to 3000 N of peak force
- Standard and high force magnetic ways
- Zero cogging reduces force ripple
- 200 V or 400 V windings
- 135 to 7560 N of peak force
- 5 m/s peak speed
- Very little cogging

SGLT
(Dual Magnet Iron-Core)

An iron core design featuring dual magnets, producing high output in a compact footprint.

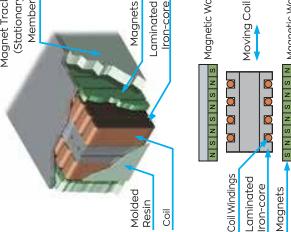

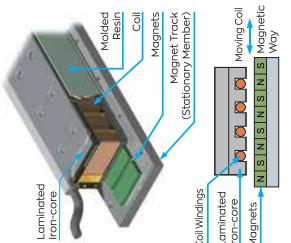

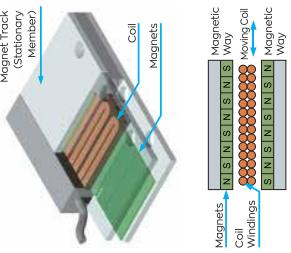

- 200 V or 400 V windings
- 380 to 7560 N of peak force
- 5 m/s peak speed
- 200 V or 400 V windings
- 380 to 7560 N of peak force
- 5 m/s peak speed
- Very little cogging

REDUCE DOWNTIME

By eliminating gear reduction and creating a direct coupling to the machine load, direct drive motors simplify your machine's design. Eliminating transmission components leads to fewer breakdowns and long-term reliability you can trust.

INCREASE PERFORMANCE

Direct drive motors get rid of the inefficiencies caused by mechanical transmission components that wear over time. Say goodbye to mechanical backlash as well. As compliance is reduced, the responsiveness of the servo system can be dramatically improved.

LINEAR MOTORS

Eliminate the effects of mechanical linkages

Yaskawa offers a full range of linear servo motors designed to handle the most demanding applications.

Yaskawa linear servo motors replace the backlash, friction, inertia and wear of mechanical linkages with smooth, precise, high performance linear motion in a compact footprint. All Yaskawa linear motors offer plug-and-play connection with Sigma-7 and Sigma-5 series SERVOPACK amplifiers, using automatic motor recognition and serial encoder technology to make implementation trouble free.

SGLT
(Dual Magnet Iron-Core)

An iron core design featuring dual magnets, producing high output in a compact footprint.

- 200 V or 400 V windings
- 380 to 7560 N of peak force
- 5 m/s peak speed
- 200 V or 400 V windings
- 380 to 7560 N of peak force
- 5 m/s peak speed
- Very little cogging

SGLF2
(Iron-Core)

Second generation iron core design that delivers high force and speed in a compact form.

- 200 V or 400 V windings
- 135 to 7560 N of peak force
- 5 m/s peak speed
- 200 V or 400 V windings
- 135 to 7560 N of peak force
- 5 m/s peak speed
- Very little cogging

SGLG
(Coreless)

Smooth linear motion with an ironless design that eliminates motor cogging.

- 200 V windings
- 40 to 3000 N of peak force
- Standard and high force magnetic ways
- Zero cogging reduces force ripple
- 200 V or 400 V windings
- 135 to 7560 N of peak force
- 5 m/s peak speed
- Very little cogging

SGM7D
(With Core, Outer Rotor)

Ideal for high torque, high precision and high rigidity.

- Built-in 24-bit encoder
- High allowable load moment of inertia ratio for large loads
- Large center aperture provides more space for wiring
- High rigidity
- Ideal for applications that require downsizing and shorter cycle time.
- Built-in 24-, 22- & 20-bit encoder
- Compact design with small rotor diameter
- High-speed, high frequency positioning
- High rigidity

SGLF2
(Iron-Core)

Ideal for high torque, high precision and high rigidity.

- Built-in 24-bit encoder
- High allowable load moment of inertia ratio for large loads
- Large center aperture provides more space for wiring
- High rigidity
- Ideal for high force and speed in a compact form.
- 200 V or 400 V windings
- 135 to 7560 N of peak force
- 5 m/s peak speed
- 200 V or 400 V windings
- 135 to 7560 N of peak force
- 5 m/s peak speed
- Very little cogging

SGLT
(Dual Magnet Iron-Core)

An iron core design featuring dual magnets, producing high output in a compact footprint.

- 200 V or 400 V windings
- 380 to 7560 N of peak force
- 5 m/s peak speed
- 200 V or 400 V windings
- 380 to 7560 N of peak force
- 5 m/s peak speed
- Very little cogging

SERVO MOTORS

SIGMA TRAC II

Ready to run, turnkey linear stages

COMPLETE LINEAR MOTION SOLUTION

Each component in Sigma Trac II
is fully assembled and tested:

- Coil and magnets
- Bearings
- Encoder
- Cables
- Cable management
- Optional bellows
- Optional X-Y mounting kit

Built-to-order and fully tested. Bolt it down, connect it up and enjoy world class linear motion immediately.

FASTER MOTION, FASTER TIME TO MARKET

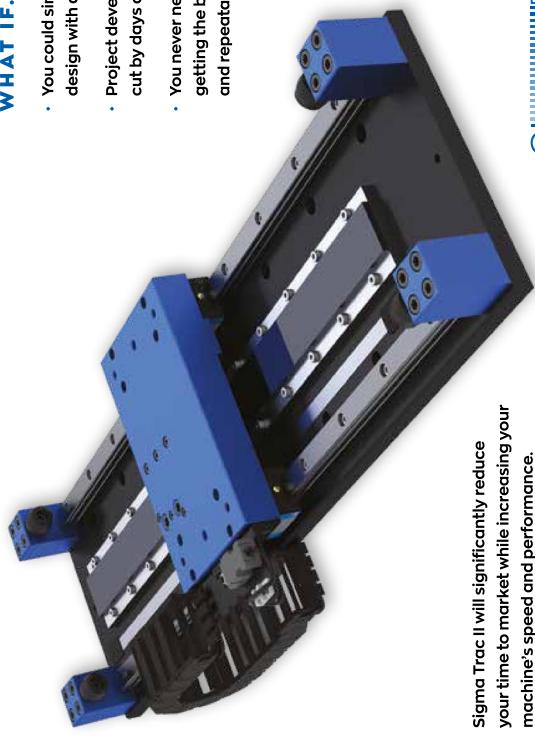

Need precise, high speed and repeatable linear motion, without the time-consuming process of designing your own linear stages?

Use Yaskawa's motion engineering expertise to spare your overworked engineers the effort of specifying, designing and sourcing components, assembly jigs and test equipment.

Our expertly designed, manufactured and tested mechatronic solutions give your machine a faster time to market and your engineering team more time to innovate.

WHAT IF...

- You could simplify your machine's design with a bolt-in linear solution?
- Project development time could be cut by days or weeks?
- You never needed to worry about getting the best in speed, reliability and repeatability?

IMPROVE MACHINE PERFORMANCE

Minimize cycle times and maximize productivity with speeds up to 5m/s and peak force output up to 5040 N.

REPEATABILITY

Coupling the load directly to the motor and encoder yields positioning repeatability of $\pm 2 \mu\text{m}$.

WIDE RANGE OF SIZES

With six motor sizes and 24 base lengths, there is a linear stage for nearly any application. Stages are available for use with 100 V, 200 V, or 400 V power.

RELIABILITY

Sigma Trac II will significantly reduce your time to market while increasing your machine's speed and performance.

ABSOLUTE ENCODER FEEDBACK

Simplifies wiring and requires no homing routines, even after removing power from the equipment

ZERO MAINTENANCE

Integrated bearing lubrication technology for long-term maintenance-free operation.

CABLE MANAGEMENT

Carefully controlling cable flex maximizes cable life. Use additional space in the cable carrier for cables and hoses to your payload

BELLOWS

Optional bellows protect magnets and encoder scale from dust, loose debris and the occasional dropped tool

SigmaTrac II

YASKAWA

33

FOOD GRADE MOTORS

High-performance FDA approved motors

Yaskawa now offers food grade servo motors that integrate seamlessly with the Sigma-7 line of SERVOPACKS.

These FDA approved white epoxy painted high performance motors are ideal for food packaging equipment. They are capable of withstanding repeated high pressure wash down and they have a smooth housing to minimize entrapment areas.

FEATURES

- FDA approved white epoxy coating
- Pinless extruded aluminum housing
- IP66 sealing (high pressure wash down)
- UL (cRUIUS), CE, RoHS
- Stainless steel shaft

HYGIENIC STAINLESS MOTORS

For demanding washdown environments

Yaskawa now offers a wide range of hygienic stainless servo motors for use with the Sigma-7 line of SERVOPACKS.

These stainless steel motors are designed for demanding wash down environments and are ideal for applications in food and beverage processing equipment. They adhere to the EHEDG hygiene standard.

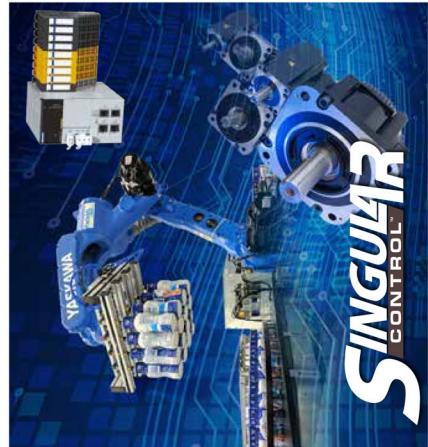

FEATURES

- 316/316L stainless steel housing, max corrosion resistance
- Smooth finish with no sharp inside corners
- IP66 for continuous flood while in operation and complete protection from dust
- 24 V holding brake option
- 2.4 to 32 Nm of continuous torque while not in operation
- Hiperface multi-turn absolute encoder
- EHEDG, UL (cRUIUS), CE, RoHS
- Stainless steel shaft
- Two frame sizes
- 200 V / 400 V windings
- 24 V holding brake option
- 2.4 to 32 Nm of continuous torque
- Hiperface multi-turn absolute encoder

SINGULAR CONTROL™

Simplify engineering design, maintenance and training, while reducing your development and machine commissioning time

A Better Way to Control Automated Motion

Tired of hiring expensive programming experts to implement a robot, or of rewriting machine code every time you integrate a new mechanism?

Then you're ready for Singular Control™, one hardware platform, one software tool, one programming standard and one vendor for everything in motion automation. Yaskawa understands.

That's why we created Singular Control, and why we're putting it to work to make your job easier.

A COMPLETE MECHATRONIC CONTINUUM
Delivering integrated control for Delta, SCARA, 6-axis, Gantry and customer-specific mechanisms.

MOTION AXES
Motion axes, standard mechanisms, robots, and custom mechanisms running interchangeably under the same controller and application code

FAMILIAR PROGRAMMING

- Program robots with ladder logic and function blocks
- No proprietary robot programming language

INTEGRATED CONTROL

Control all types of mechanisms with one software engineering tool using the same function blocks

MACHINE FLEXIBILITY

Swap mechanism type with minimal changes to application code

FUTURE ENABLED

- Easily upgrade to new mechanisms
- Migrate your machine IP as your technology progresses

ROBOTICS PORTFOLIO

FAST. FLEXIBLE. RELIABLE.

Our full suite of material handling robots make it easy to integrate the ideal solution for your most challenging applications

Designed to optimize material handling operations from beginning to end, Yaskawa robots deliver exceptional speed and precision.

Whether your focus is food/beverage, pharmaceutical, consumer products or specialty items, our full suite of products and technologies make it easy to configure, program and integrate an ideal solution to meet your production goals.

HIGH SPEED PICKING

Perfect your primary operations with our extremely accurate and nimble picking robots.

MotoMini

- 0.5kg payload
- 350 mm horizontal reach
- 495mm vertical reach

MPP3 Series (Delta)

- 3 kg payload, 150 rpm
- 800 - 1,300 mm horizontal reach
- 300 mm - 601 mm z-stroke
- IP67-rated body, NSF-H1 certified food-grade lubricants

SG Series (SCARA)

- 3 - 6 kg payload
- 400 - 650 mm radial reach
- 200 - 210 mm z-stroke

COLLABORATIVE

Highly versatile and portable, HC-series cobots are ideal for a variety of tasks including machine tending, material handling, packaging and light assembly.

HC10XP / HC20XP

- 10 kg / 20 kg payload
- 1,200 mm / 1,700 mm max. reach
- IP67-rated body, NSF-H1 certified food-grade lubricants

MPK/NPL Series

- 2.0 - 800 kg payloads
- 900 - 3159 mm horizontal reach
- 1551 - 3291 mm vertical reach
- IP67-rated body, NSF-H1 certified food-grade lubricants

PALLETIZING

Move boxes and load pallets with greater consistency and ease using our efficient palletizing robots.

PL Series

- 80 - 500 kg payloads
- 2061 - 3159 mm horizontal reach
- 3024 - 3291 mm vertical reach

CUSTOM SOLUTIONS FOR CUSTOMER NEEDS

ENGINEERED SERVICES GROUP

Our experts in automation and machine control are ready to design and build whatever is necessary to make new automation ideas possible.

Yaskawa is known for creating exceptional motion automation components. It is only natural to back up this reputation with an exceptional ability to help customers put them to use. Our capabilities range from custom enclosures, panels and cables to complete retrofits and electromechanical assemblies.

CONTROL SYSTEMS

Equipped to Handle Every Facet of Automated Systems

Our A-to-Z capability includes development of mechanical systems and control architecture, panel design, wiring, mechanical design and assembly...all the way to shipping, stocking and fulfillment.

Whether you are looking to outsource some or all of the control system manufacturing for a new machine design or seeking a turnkey retrofit of existing equipment, Yaskawa Engineered Systems Group is your one stop for integration of the best automation products in the industry.

CUSTOM CABLES

Plug and play Cables for any Equipment!

Yaskawa Engineered Systems Group can provide everything from connectors and raw wire to complete wiring harnesses.

- Custom lengths
- Complete harnesses
- Connector installations
- Armored and special specification cables
- Conduit
- JII / Stocking program

CUSTOM ENCLOSURES AND PANELS

Custom without Complexity

Every aspect of control enclosure manufacturing is covered by Engineered Systems, from design and component selection to cabinet manufacturing, wiring and preparation for final installation.

Combine top quality Yaskawa control components, with hardware, cabinetry and connectors to match. Enjoy Yaskawa performance without the complexity of panel design.
